Robert Swinney is an Associate Professor in the Operations Management group at the Duke University Fuqua School of Business, where he teaches the core class on operations management in the daytime MBA program. His research focuses on multiple player problems in supply chain management with a particular concentration on the impact of customer behavior on firm decision-making, social and environmental responsibility in supply chains, and the operations of start-up firms. His domains of expertise include retailing, manufacturing, and the automotive, apparel, and consumer electronics industries, and his work has been published in *Management Science* and *Manufacturing & Service Operations Management*. Prior to joining Fuqua, he received a bachelor’s degree in astronomy from the California Institute of Technology in 2002, a Ph.D. in operations management from the Wharton School of the University of Pennsylvania in 2008, and was a faculty member at the Stanford University Graduate School of Business from 2008 to 2013.
