Yehua Wei is an Assistant Professor in the Decision Sciences area at the Fuqua School of Business. He joined Fuqua on July, 2013. Prior to that, he received his PhD in Operations Research from Massachusetts Institute of Technology. He teaches Spreadsheet Modeling and Decision Analysis.

Professor Wei’s research lies in the area of operations research. His specific research interests include the benefit and design of limited resource pooling, supply chain risk mitigation, and decision making under uncertainty. He has conducted research in both theoretical and application domains. He was the 2nd place winner of the 2011 George Nicholson Paper Competition, and the 2nd place winner of the 2013 CSAMSE Best Paper Competition. His publications have been accepted by journals such as Operations Research and Harvard Business Review. Professor Wei has also worked with the Ford Motor Company to help it to identify and quantify its supply chain risks.
